FLYING REVIEW INTERNATIONAL

Contents for Year 1971 — Volume XXVI

SPECIAL FEATURES

Twenty-five years of Interavia

Vigorous growth, but fading profits. A quarter century of aviation development: 4/327. On the edge of the '70s: 4/349.

The French aerospace industry

Design potential, activities and funding: 5/513
Civil aircraft: 5/515
Military aircraft: 5/517
Helicopters: 5/518
Missiles: 5/520
Engines: 5/521
An interview with B. C. Vallières of Dassault-Breguet: 5/522
Interavia talks to Henri Ziegler: 5/523
The State's 6th Plan—J. N. Adenot: 5/526

Space programmes around the World—a series in four parts

Part 1 — Federal Germany, France, Great Britain: 5/554
Part 2 — Italy: 6/700
Part 3 — Japan—H. Sueyoshi: 10/1154
Part 4 — The Netherlands: 11/1311

Business aviation

Business aviation in Europe: 9/1057
The driving force behind air travel at Philips: 9/1058
Joint travel is more rational: 9/1058
The advantages of jet aircraft leasing: 9/1059
More than just an aircraft: the Cessna Citation: 9/1060
Operating a fleet of executive jets as business tools—J. P. Geddes: 9/1062
Trends in business aircraft construction: 9/1063
Technical data of some turboprop business aircraft: 9/1065
Technical data of some business jets: 9/1067

Automatic flight—a series in eight parts—M. A. Nibloe, M. P. Brown, D. L. Stevenson

Part 1 — The requirement: 10/1141
The American view: 10/1145
Triplex and simplex—the Trident and the Caravelle: 10/1148
Part 2 — ATA roundtable discussion on automatic flight and landing: 11/1300
Boeing 747 certificated for Cat III: 11/1303
The VC.10 and BAC One-Eleven flight and landing systems: 11/1306
Part 3 — Into the next decade—the TriStar AFCS: 12/1412
TAPIR—a French approach to automatic flight: 12/1415

State of the airline industry

Profitless growth—C. Stuart: 11/1243
A time for realism—M. A. Nibloe: 11/1245
Reasons for the crisis—C. C. Tillinghast: 11/1249
The supplementals' right to live: 11/1251

Action against aircraft noise

The NASA quiet engine programme—J. J. Kramer: 12/1373
Studies of Concorde's characteristics: 12/1377
French research in jet engine silencing—J. Spincourt: 12/1380

Civil aviation

a) Air transport

ITA—"Tourism and air transport"—J. F. Brindley: 1/30
Air cargo—the sleeping giant: 1/31
The jumbo jet cargo handling tangle—J. P Geddes: 1/34
The airfreightage of airmail: 1/37
Automatic cargo sorting Lufthansa style: 1/38
Future international air cargo prospects—D. Cornell: 1/40
Heliswiss—a world-wide operator: 1/66
Icelandair—a northern light—J. F. Brindley: 1/68
Jugoslavenski Aerotransport: steady expansion: 1/70
Airports in the transport system—H. Diehl: 1/83
ATC planning in the USA—D. Cornell: 2/135
The Eighth Convention of the UK Guild of Air Traffic Control Officers—T. M. B. Wright: 2/136
Schiphol Airport air traffic control for the seventies: 2/138
The Dioscures project from the economic viewpoint: 2/140
Thin end of the wedge—IATA approves fare surcharges to recover users' charges: 3/231
Roskill Commission report raises the question: Does London need another airport?: 3/249
Airline automation: 3/257
Is there a need for precision approach radar?—3/264
Vigorous growth, but fading profits. A quarter century of aviation development: 4/327
Equipment for the interface: 4/398
Automation at KLM: 4/402
Malaysia—Singapore Airlines: 5/500
Spectacular use of Fokker F.28 by Iberia—D. H. Chopping: 5/581
Civil aviation in Brazil: 6/668
Boeing's Superjet—the first year in service—M. A. Nibloe: 6/684
Canada going for intercity STOL—D. H. Chopping: 6/688
A thousand and one flights—Saudi Arabian Airlines—M. P. Brown: 6/692
A voyage to Latin America—J. F. Brindley
AVENSA in close-up: 6/695
VARIG—South America's largest carrier: 6/697
Chairman Browne of the CAB: 7/782
The SST threat to the environment. Facts or guesswork: 7/813
Caledonian/BUA. The second force: 7/833
Are tariff changes the solution: 8/893
The Gordian knot. ATC problems in the USA: 8/933
Implementing the FAA 10-year plan: 8/937
Caledonian/BUA—A new major airline: 8/955
Rousseau—Aviation's success story: 9/1043
Alitalia: aspects of aircraft maintenance—K. Höhle: 9/1044
UK military and civil air traffic control in harmony—D. L. Stevenson: 9/1072
Automatic flight—a series in eight parts—M. A. Nibloe, M. P. Brown, D. L. Stevenson—
Part 1—The requirement: 10/1141
The American view: 10/1145
Triplex and simplex—the Trident and the Caravelle: 10/1148
American thoughts on STOL: 10/1172
The role of V/STOL in civil aviation—A. Bridenne: 10/1177
American Airlines investigates STOLports: 10/1179
STOL operations to increase airport capacity: A British view: 10/1180
Air traffic control . . . . crisis in the United States—J. P. Geddes: 10/1182
State of the airline industry
A profitless growth—C. Stuart: 11/1243
A time for realism—M. A. Nibloe: 11/1245
Reasons for the crisis—C. C. Tillinghast: 11/1249
The supplementals' right to live: 11/1251
MSA reverses the trend: 11/1253
Seamróig san aer: Aer Lingus—Aerlinte Eirann—J. F. Brindley: 11/1254
Quantas and the 747—M. A. Nibloe: 11/1256
The development of scheduled air traffic 1968-70: 11/1275
1970 scheduled traffic of IATA airlines: 11/1276
Pillars of world air transport: 11/1277
Automatic flight—part 2—M. A. Nibloe, M. P. Brown, D. L. Stevenson
ATA roundtable discussion on automatic flight and landing: 11/1300
Boeing 747 certificated for Cat III: 11/1303
The VC.10 and BAC One-Eleven flight control and landing systems: 11/1306
PanAm goes deeper into the red: CAB Chairman Brown reacts: 11/1325
Automatic flight—part 3—M. A. Nibloe, M. P. Brown, D. L. Stevenson
Into the next decade—the TriStar AFCS: 12/1416
TAPIR—a French approach to automatic flight 12/1419
IFALPA's Newnav symposium—T. M. B. Wright: 12/1421

b) Airlines

Automatic cargo sorting Lufthansa style: 1/38
Heliswiss—a world-wide operator: 1/66
Icelandair—a northern light—J. F. Brindley: 1/68
Jugoslavenski Aerotransport: steady expansion: 1/70
Automation at KLM: 4/402
Malaysia—Singapore Airlines: 5/500
Spectacular use of Fokker F.28 by Iberia—D. H. Chopping: 5/581
A thousand and one flights—Saudi Arabian Airlines—M. P. Brown: 6/692
A voyage to Latin America—J. F. Brindley
AVENSA in close-up: 6/695
VARIG—South America's largest carrier: 6/697
Caledonian/BUA. The second force: 7/833
Caledonian/BUA. A new major airline: 8/955
Rousseau—Aviation's success story: 9/1043
Alitalia: aspects of aircraft maintenance—K. Höhle: 9/1044
American Airlines investigates STOLports: 10/1179

MSA reverses the trend: 11/1253
Seamróig san aer: Aer Lingus-Aerlinte Eirann—J. F. Brindley: 11/1254
Quantas and the 747—M. A. Nibloe: 11/1256
1970 scheduled traffic of IATA airlines: 11/1276
Pillars of world air transport: 11/1277
PanAm goes deeper into the red: CAB Chairman Browne reacts: 11/1325

c) Airports

Air cargo—the sleeping giant: 1/31
The jumbo jet cargo handling tangle—J. P. Geddes: 1/34
The airfreightage of airmail: 1/37
Automatic cargo sorting Lufthansa style: 1/38
Airports in the transport system—M. Diehl: 1/83
Schiphol Airport air traffic control for the seventies: 2/138
ILS and the microwave landing system—E. R. Hollm: 2/142
New equipment for terminal area control—P. Abraham 2/151
Airport surface detection equipment—2/170
An operational aid for warning of aquaplaning conditions—J. E. Forbat: 2/164
Roskill Commission report raises the question: Does London need another airport?: 3/249
Airline automation: 3/257
Is there a need for precision approach radar?: 3/264
Equipment for the interface: 4/398
Automation at KLM: 4/402
The Gordian knot, ATC problems in the USA: 8/933
Implementing the FAA 10-year plan: 8/937
MADGE—a new landing guidance aid—T. M. B. Wright: 8/939
Alitalia: aspects of aircraft maintenance—K. Höhle: 9/1044
Dubai International Airport—D. H. Wood: 9/1076
American Airlines investigates STOLports: 10/1179
STOL operations to increase airport capacity: A British view: 10/1180
Air traffic control . . . crisis in the United States—J. P. Geddes: 10/1182

d) General aviation

For business and private pilots—see " Regular features "
Heliswiss—a world-wide operator: 1/66
European Sabreliner sales effort: 2/155
An American view: The outlook for general aviation—G. T. Humphrey: 3/232
FAI: Tradition and progress: 3/234
The light aircraft choice for 1971: 3/236
Technical data of some piston-engined light aircraft: 3/239
News from Bethany. The Aero Commander 112: 3/243
Avions Pierre Robin at full throttle: 3/244
The aerobatics story—A. Wagner: 3/246
Vigorous growth, but fading profits. A quarter century of aviation development: 4/327
The French aerospace industry—Civil aircraft: 5/515
Helicopters: 5/518
General aviation in France—P. Girault: 5/545
The aerospace industry in Europe. A survey of national activity: 5/548
Agusta's wide range of helicopters—D. L. Stevenson: 7/816
The Brazilian aircraft industry—R. S. Olive: 7/819
Israel Aircraft Industries—B. J. Davidson: 7/836
General aviation at Le Bourget: 8/917
New technology for Mexico: 8/947
Business aviation in Europe: 9/1057
The driving force behind air travel at Philips: 9/1058
Joint travel is more rational: 9/1058
The advantages of jet aircraft leasing: 9/1059
More than just an aircraft: the Cessna Citation: 9/1060
Operating a fleet of executive jets as business tools—J. P. Geddes: 9/1062
Trends in business aircraft construction: 9/1063
Technical data of some turboprop business aircraft: 9/1065
Technical data of some business jets: 9/1067
New from Piper: Seneca and Turbo Navajo B: 10/1111
The Japanese aircraft industry today—Masato Yamano: 10/1157
Sportavia-Pützer light aircraft: 11/1225
New from Down under: the N2: 11/1310
Amateur aircraft builders meet in Oshkosk: 11/1314
At NBAA—waiting for the upturn—J. P. Geddes: 11/1320
The FAI confronted with new problems: 12/1423

Military aviation

The Saab 37 Viggen. A progress report: 1/74
Panavia 200 development has commenced: 2/148
Lynx—the third Anglo-French helicopter: 2/171
The United States military budget proposals: 3/225
The Northrop P.530 Cobra—J. P. Geddes: 3/226
Vigorous growth, but fading profits. A quarter century of aviation development: 4/327
Grumman faces F-14 cost overrun: 5/500
The French aerospace industry—
Military aircraft 5/517
Helicopters: 5/518
Missiles: 5/520
Radar-map matching in navigation and attack: 6/709
MRCA—the bids roll in: 6/711
Military programmes and projects at the 29th Paris Air Show: 7/792
Weapon systems at Paris—the sea takes priority: 8/921
MADGE—a new landing guidance aid—T. M. B. Wright: 8/939
A progress report on the B-1 bomber— J. P. Geddes: 8/940
Alpha Jet development phase beginning: 8/957
Wings of change—a new concept for RAF Germany—D. L. Stevenson: 9/1031
Each US service has its own views on Close Air Support: 9/1034
Harrier in the US Marine Corps: 9/1035
Flight testing starts on the VAK 191B—R. Riccius: 9/1037
UK military and civil air traffic control in harmony—D. L. Stevenson: 9/1072
Jaguar operations soon—R. Salvy: 12/1406

Aircraft

a) Civil aircraft

The Bertin Aladin II STOL transport: 2/115
André Turcat on Concorde testing: 2/153
European Sabreliner sales effort: 2/155
The light aircraft choice for 1971: 3/236
Technical data of some piston-engined light aircraft: 3/239
News from Bethany. The Aero Commander 112: 3/243
Plans for a new Brazilian transport: the EMB500—R. S. Olive: 3/251
Mercure readied for first flight: 3/252
Vigorous growth, but fading profits. A quarter century of aviation development: 4/327
In 18 months: first flight of the European Airbus: 4/371
Evolution of a transport: the growth of the DC-10—J. P. Geddes: 4/389
The French aerospace industry—
Civil aircraft: 5/515
Helicopters: 5/518
The aerospace industry in Europe. A survey of national activity: 5/548
Spectacular use of Fokker F.28 by Iberia—D. H. Chopping: 5/581
Boeing's Superjet—the first year in service—M. A. Nibloe: 6/684
VFW 614 nears first flight: 6/691
Le Bourget 1971. The World's most expensive fair: 7/787
Agusta's wide range of helicopters—D. L. Stevenson: 7/816
The Brazilian aircraft industry—R. S. Olive: 7/819
Israel Aircraft Industries—B. J. Davidson: 7/836
General aviation at Le Bourget: 8/917
New technology for Mexico: 8/947
Concorde progress brought up to date: 9/1012
The TriStar flies on: 9/1024
The VFW 614 flight test programme: 9/1040
More than just an aircraft: the Cessna Citation: 9/1060
Trends in business aircraft construction: 9/1063
Technical data of some turboprop business aircraft: 9/1065
Triplex and simplex—the Trident and the Caravelle: 10/1148
New from Piper: Seneca and Turbo Navajo B: 10/1111
The Japanese aircraft industry today—Masato Yamano: 10/1157
Aérospatiale A.904 STOL transport: 10/1178
Sportavia—Pützer light aircraft: 11/1225
Quantas and the 747—M. A. Nibloe: 11/1256
Boeing 747 certificated for Cat III: 11/1303
The VC.10 and BAC One-Eleven flight control and landing systems: 11/1306
New from Down-Under: the N2: 11/1310
Amateur aircraft builders meet in Oshkosh: 11/1314
Expanding Concorde's test envelope—D. H. Chopping: 11/1323
Into the next decade—the TriStar AFCS: 12/1415

b) Military aircraft

The Saab 37 Viggen. A progress report: 1/74
Panavia 200: development has commenced: 2/148
Lynx—the third Anglo-French helicopter: 2/171
Plans for a new Brazilian transport: the EMB 500-R. S. Olive: 3/251
The Northrop P530 Cobra—J. P. Geddes: 3/226
Vigorous growth, but fading profits. A quarter century of aviation development: 4/327
Grumman faces F-14 cost overrun: 4/500
The French aerospace industry—
Military aircraft: 5/517
Helicopters: 5/518
The aerospace industry in Europe. A survey of national activity: 5/548
MRCA—the bids roll in: 6/711
Military programmes and projects at the 29th Paris Air Show: 7/792
Agusta's wide range of helicopters—D. L. Stevenson: 7/816
Israel Aircraft Industries—B. J. Davidson: 7/836
The Brazilian aircraft industry—R. S. Olive: 7/819
A progress report on the B-1 bomber—J. P. Geddes: 8/940
Alpha Jet development phase beginning: 8/957
Flight testing starts on the VAK 191B—R. Riccius: 9/1037
Harrier in the US Marine Corps: 9/1035
The Japanese aircraft industry today—Masato Yamano: 10/1151
New from Down-Under: the N2: 11/1310
Jaguar operational soon—R. Salvy: 12/1406

Powerplants

Historical highlights of the Viper: 1/63
4,000th PT6 delivered: 3/251
Vigorous growth, but fading profits, A quarter century of aviation development: 4/327
The French aerospace industry—
Engines: 5/521
Engines at Le Bourget. Increased power and reduced dimensions: 7/796
Development of two new turbojets: General Electric TF34 and Rolls-Royce/SNECMA M45M: 7/822
Rolls-Royce Small Engine Division: current programmes—D. H. Wood: 9/1042
The General Electric F101 augmented turbofan—J. P. Geddes: 10/1187
STOL power—the Garrett view: 10/1188

Action against aircraft noise—
The NASA quiet engine programme—J. J. Kramer: 12/1373
Studies of Concorde's characteristics: 12/1377
French research in jet engine silencing—J. Spincourt: 12/1380
Continuing development on the General Electric CF6-50: 12/1382
K. Merten-Feddeler

Avionics and communications

The industrial scene—see " Regular features "
Electronic Communications Inc.: 1/46
VTOL avionics systems—D. J. Mayes: 1/72
Eurocontrol after 10 years—R. Bullin: 2/132
ATC planning in the USA—D. Cornell: 2/135
The Eighth Convention of the UK Guild of Air Traffic Control Officers—T. M. B. Wright: 2/136
Schiphol Airport air traffic control for the seventies: 2/138
The Dioscures project from the economic viewpoint: 2/140
ILS and the microwave landing system—E. R. Hollm: 2/142
V/STOL controls and displays—R. W. Howard: 2/144
OMERA-SEGID meteorological radars: 2/147
New equipment for terminal area control—P. Abraham: 2/151
An operational aid for warning of aquaplaning conditions—J. E. Forbat: 2/164
Airport surface detection equipment: 2/170
Airline automation: 3/257
Is there a need for precision approach radar?: 3/264
Automation at KLM: 4/402
The French aerospace industry—Missiles: 5/520
The French aerospace equipment industry—P. J. Souriau: 5/579
Telecom 71—communications for the seventies: 6/703
The 18th Rome Electronic Exhibition: 6/708
Radar-map matching in navigation and attack: 6/709
MRCA—the bids roll in: 6/711
SLAR to map uncharted regions: 6/712
Proposed new Intelsat agreement: 7/779
Weapon systems at Le Bourget—the sea takes priority: 8/921
Equipment at Le Bourget—the new sources: 8/922
Telecom 71—message for the 21st century: 8/930
The Gordian knot. ATC problems in the USA: 8/933
Automatic air traffic control displays—T. H. Harrison: 8/934
Implementing the FAA 10 year plan: 8/937
MADGE—a new landing guidance aid—T. M. B. Wright: 8/939
Honeywell modular automatic test equipment—R. B. Gustafson: 9/1069
UK military and civil air traffic control in harmony—D. L. Stevenson: 9/1072
Automatic flight—a series in eight parts—M. A. Nibloe, M. P. Brown, D. L. Stevenson
Part 1—The requirement: 10/1141
The American view: 10/1145
Triplex and simplex—the Trident and the Caravelle: 10/1148
The global satellite communications system: 10/1165
Telecommunication satellites launched to date: 10/1169
ESRO's interest in communications satellites: 10/1170
Air traffic control . . . crisis in the United States—J. P. Geddes: 10/1182
European radar and flight data processing systems: 10/1184
Automatic flight—Part 2—M. A. Nibloe, M. P. Brown, D. L. Stevenson
ATA roundtable discussion on automatic flight and landing: 11/1300
Boeing 747 certificated for Cat III: 11/1303
The VC, 10 and BAC One-Eleven flight and landing systems: 11/1306
Trans Com—a new name in inflight entertainment: 11/1309
Automatic flight—Part 3—M. A. Nibloe, M. P. Brown, D. L. Stevenson
Into the next decade—the TriStar AFCS: 12/1412
TAPIR—a French approach to automatic flight: 12/1415
IFALPA's Newnav symposium—T. M. B. Wright: 12/1421

Astronautics

Space news in brief—see " Regular features "
Soviet meteorological satellites and research: 1/75
Lunokhod 1, Soviets land first vehicle on Moon: 1/78
The Dioscures project from the economic viewpoint: 2/140
Future United States space plans: 2/156
Soviet—American co-operation in space: 3/218

Industry and aviation technology

The industrial scene—see " Regular features
A European aerospace market?: 1/19
Electronic Communications Inc.: 1/46
The Saab 37 Viggen. A progress report: 1/74
Rail transport adopts aviation techniques—J. Spincourt: 1/79
Formation of Airbus Industrie: 2/111
Panavia 200: development has commenced: 2/148
André Turcat on Concorde testing: 2/153
European Sabreliner sales effort: 2/155
Lynx—the third Anglo-French helicopter: 2/171
Conservation or waste: 3/211
The Roll-Royce crash: 3/225
The Northrop P530 Cobra—J. P. Geddes: 3/226
New from Bethany. The Aero Commander 112: 3/243
Avions Pierre Robin at full throttle: 3/244
The aircraft production outlook at BAC and HSA: 3/250
Plans for a new Brazilian transport: the EMB500—R. S. Olive: 3/251
4,000th PT6 delivered: 3/251
Mercure readied for first flight: 3/252
Belgian aerospace activity—B. J. Davidson: 3/254
Vigorous growth, but fading profits. A quarter century of aviation development: 4/327
In 18 months: first flight of the European Airbus: 4/371
Evolution of a transport. The growth of the DC-10—J. P. Geddes: 4/389
Equipment for the interface: 4/398
A time of change: 5/485
Grumman faces F-14 cost overrun: 5/500
The French aerospace industry: 5/513
Civil aircraft: 5/515
Military aircraft: 5/517
Helicopters: 5/518
Missiles: 5/520
Engines: 5/521
Project leadership depends on merit. An interview with B. C. Vallières of Dassault-Breguet: 5/522
Concorde: work for 50,000 people. Interavia talks to Henri Ziegler: 5/523
The French aerospace industry and the State's 6th Plan—J. N. Adenot: 5/526
The aerospace industry in Europe. A survey of national activity: 5/548
The French aerospace equipment industry—P. J. Souriau: 5/579
The Soviet challenge: 6/657
A report on the US aerospace industry—J. P. Geddes: 6/679
Boeing's Superjet—the first year in service—M. A. Nibloe: 6/684
Canada going for intercity STOL— D. H. Chopping: 6/688
VFW 614 nears first flight: 6/691
MRCA—the bids roll in: 6/711
Changing patterns of influence: 7/771
Le Bourget 1971. The world's most expensive fair: 7/787
STOL projects revealed at Le Bourget: 7/791
Engines at Le Bourget. Increased power and reduced dimensions: 7/796
The SST threat to the environment. Facts or guesswork: 7/813
Agusta's wide range of helicopters—D. L. Stevenson: 7/816
The Brazilian aircraft industry—R. S. Olive: 7/819
Development of two new turbojets: General Electric TF34 and Rolls-Royce/SNECMA M45 H: 7/822
Israel Aircraft Industries—J. B. Davidson: 7/836
A progress report on the B-1 bomber—J. P. Geddes: 8/940
New technology for Mexico: 8/947
Alpha Jet development phase beginning: 8/957
Who speaks for Europe?: 9/1011
Concorde progress brought up to date: 9/1012
The TriStar flies on: 9/1024
Flight testing starts on the VAK 191B—R. Riccius: 9/1037
The VFW 614 flight test programme: 9/1040
Rolls-Royce Small Engine Division: current programmes—D. H. Wood: 9/1042
Alitalia: aspects of aircraft maintenance—K. Höhle: 9/1044
NASA's X-24 changes shape: 9/1077

Decision-making—emotive or scientific?: 10/1105
New from Piper: Seneca and Turbo Navajo B: 10/1111
The Japanese aircraft industry today—Masato Yamano: 10/1151
Aérospatiale A.904 STOL transport: 10/1178
The General Electric F101 augmented turbofan—J. P. Geddes: 10/1187
STOL power—the Garrett view: 10/1188
Towards a European aircraft industry: 11/1219
Sportavia-Pützer light aircraft: 11/1225
Trans Com—a new name in inflight entertainment: 11/1309
New from Down-Under—the N2: 11/1310
Where is Boeing going?: 11/1312
Expanding Concorde's test envelope—D. H. Chopping: 11/1323
A change of policy: 12/1353
Action against aircraft noise—
The NASA quiet engine programme—J. J. Kramer: 12/1373
Studies of Concorde's characteristics: 12/1377
French research in jet engine silencing—J. Spincourt: 12/1380
Continuing development on the General Electric CF 6-50—K. Merten-Feddeler: 12/1382
Lockheed's Haughton on the record—J. P. Geddes: 12/1384
Transonic transport development—L. T. Goodmanson: 12/1386
The USIAS annual report 1970-71: 12/1388
Italy weighs aerospace industry future: 12/1405
Jaguar operational soon—R. Salvy: 12/1406

Air Shows, conferences and exhibitions

Telecom 71—communications for the seventies: 6/703
The 18th Rome Electronic Exhibition: 6/708
The 29th Paris Air Show—
Le Bourget 1971. The world's most expensive fair: 7/787
General aviation at Le Bourget: 8/917
Weapon systems—the sea takes priority: 8/921
Equipment—the new sources: 8/922
The Soviet space pavillion: 8/929
Telecom 71—message for the 21st century: 8/930
Japan's International Aerospace Show, Nagoya: 10/1156
The Nagoya Show—M. A. Nibloe & J. F. Brindley: 12/1363
22nd International Astronautical Federation Congress in Brussels: 12/1410
IFALPA's Newnav symposium—T. M. B. Wright: 12/1421
The FAI confronted with new problems: 12/1423

Regular features

The world of aerospace: 1/20—2/112—3/212—4/361—5/486—6/658—7/772—8/894—9/1014—10/1106—11/1220—12/1354
For business and private pilots: 1/24—2/116—4/366—5/490—6/662—7/776—8/898—10/1110—11/1224—12/1360
Space news in brief: 1/26—2/118—3/217—4/368—5/492—6/664—7/778—8/900—9/1017—10/1112—11/1226—12/1358
International aviation digest: 1/27—2/127—3/223—4/386—5/497—6/665—7/780—8/905—9/1025—10/1125—11/1231—12/1361
The industrial scene: 1/42—2/160—3/260—4/394—5/558—6/704—7/838—8/944—11/1316—12/1417
Letters to the editor: 1/85—7/842
International meetings and conferences: 1/85—2/172—3/270—4/405—5/585—6/668—7/842—8/959—9/1078—10/1189—11/1327—12/1423
Book reviews: 2/172—3/270—4/405—5/585—7/842—8/959—9/1077—11/1326—12/1424
Viewpoint: 3/269

Tables

Technical data of some piston-engined light aircraft: 3/239
Some important events in aviation and space during the period 1946-1971: 4/328
Principal French equipment manufacturers: 5/579
Performance of the British electronics industry in 1970: 6/707
The aircraft shown at the 1971 Paris Air Show: 7/799
Basic technical data for current Brazilian aircraft: 7/821
Technical data of some current Bellanca models: 8/898
Technical data of some turboprop business aircraft: 9/1065
Technical data of some business jets: 9/1067
Review of American manned space missions: 10/1124
Japanese aircraft industry output 1952-1970: 10/1151
Japanese aircraft deliveries 1962-1971: 10/1152
Japanese aircraft and equipment imports 1952-1970: 10/1152
Japanese aircraft and engine manufacturers: 10/1153
Earth station development schedule: 10/1166
Intelsat members: 10/1168
Telecommunication satellites launched to date: 10/1169
FAA 10 year plan 1972-1982. Research and development funding summary: 10/1183
Development of civil air transport 1945-1970: 11/1248
Scheduled world air traffic 1968-1970: 11/1275
1970 scheduled traffic of IATA airlines: 11/1276
Pillars of world air transport: 11/1277
